

EMERITA CLINICAL

Emerita Sovereign Engine (ESE)

Sovereign infrastructure for high-trust, regulated AI workflows

Overview

Emerita Clinical builds the Emerita Sovereign Engine (ESE) — a governed, deterministic runtime that provides tamper-evident audit trails, PHI/PII redaction, role-based controls, and self-hosted deployment options. ESE is optimized for healthcare, finance, research, and other regulated domains where explainability and auditability are required.

Key Differentiators

- Deterministic execution & deterministic replay
- Merkle-signed, tamper-evident audit trails
- PHI/PII auto-redaction (property-tested)
- Self-hosted & cloud-hosted deployment patterns
- Designed to support HIPAA workflows (shared responsibility)

Quick Stats

- 844 PHI patterns tested
- 0% PAN leakage
- 83ms audit verification

Pricing

Free — \$0 / month (1,000 events)

Pro — \$59 / month or \$590 / year (100,000 events)

Enterprise — Custom (starts at \$2,500 / month)
